Work Experience

Front-end Developer & UI/UX Designer

June 2025 — Present

Freelance

- Designing and building a responsive web platform for a legal services client using Next.js and Tailwind CSS, translating complex legal workflows into clean, user-friendly interfaces
- Leading end-to-end product development from requirements gathering and wireframing to implementation, ensuring the solution aligns with both business goals and user needs

Application Support Engineer

Dec 2023 — Present

Wipro Limited - Texas Instruments Inc.

- Delivering Level 1 production support for Texas Instruments Inc., ensuring uptime and stability across 20+ cross-functional teams
- Streamlined incident resolution through systematic troubleshooting and root cause analysis, minimizing downtime impact
- Partnered with engineering teams to document critical issues, contributing to more resilient and well-maintained production systems

Flutter Mobile Developer Intern

Jan 2023 — May 2023

FFUF Manila Inc.

- Built 5+ mobile applications during an intensive Flutter bootcamp, gaining hands-on experience in Dart, Redux state management, and async programming
- Contributed to a live codebase using Git workflows, feature branching, pull requests, and code reviews — guided by senior developers on clean architecture
- Worked in an Agile/Scrum team environment, participating in daily standups and collaborative peer reviews
- Resolved UI and responsiveness issues on the Markilux Web App via Jira, directly improving cross-device user experience

Projects

The International Will Registry

- Owned the front-end development and UI design of a secure estate planning platform, collaborating with the team from client requirements gathering through production delivery
- Translated client needs into UX-driven designs with accessibility in mind — including simplified user flows tailored for elderly users
- Designed UI mockups and made key UX/UI decisions independently, balancing client expectations with technical feasibility
- Conducted manual end-to-end testing, tracked defects, and resolved bugs across the full user flow

Web-Based Patient Records Management and Appointment System

- Led front-end design and development of a patient records, appointment scheduling, and payment tracking system for Rimorin Dental Clinic
- Built responsive and accessible UIs using React, Bootstrap, and CSS3
- Reduced manual administrative work by ~90%, improving scheduling efficiency and data accuracy
- Created wireframes and prototypes in Figma to refine UX and visual design

Skills

Programming Languages

TypeScript, JavaScript, Java, SQL, HTML, CSS

Libraries & Frameworks
